

# 9/11/01 an inside job?

By **MATTHEW HORTON WOODSON**, ‘Independent’ U.S. Congressional Candidate

Dear President Bush,

I am the only Congressional Candidate with a plan to win the “war on terror”, but first we must revisit the day it began.

Any objective observer willing to look at the evidence will quickly realize that the crimes of September 11th were in part the work of domestic criminals. One simply must look at the obvious controlled demolition of the 3rd tower to make that conclusion. This past February I first saw the 47-story World Trade Center 7 (WTC7) collapse in 6.5 seconds at 5:20pm on 9/11. Many Americans believe that only 2 towers collapsed, this ignorance is due to a combination of Government and media failures to inform the public. It is possible that you are unaware of this building due to faulty intelligence, therefore I feel it my civic duty to provide you and the citizens of the 5th district the opportunity to know some facts that didn’t make it into the 9/11 commission report.

If indeed explosives brought down WTC7, as I claim, someone must have had access to the buildings. Your brother Marvin, who never testified before 9/11 commission, may be able to offer some insight. Apparently, he was a director of the security firm that held the contract for the WTC complex, and I believe may have some valuable information the American people should know. Larry Silverstein, who purchased the buildings just months before, has stated they decided to “pull” the building. Apparently, that is a term used in the demolition industry. It should be noted that Mr. Silverstein profited from the insurance payments he received for the 9/11 terrorist attacks.

According to the White House web site, you watched the first plane hit the first tower before entering that Florida classroom. Therefore, you must have watched it live. The only video the nation has ever seen of this crash wasn’t available for about 15 hours after the crash. This leads me to believe the terrorist may have somehow provided you with a video feed. I believe our country should know how you saw the initial attack.

On 9/10/01 Mr. Rumsfeld announced the Pentagon couldn’t account for \$2.3 trillion dollars. That is about \$8,000 for every person in our country. Mr. Rumsfeld, assigned the comptroller of the Pentagon (who holds dual citizenship) the task of finding this money. Apparently the majority of this money has never been accounted for.

Neither you nor Mr. Cheney testified under oath about the crimes of 9/11 and the FBI doesn’t have enough evidence to indict Osama Bin Laden for 9/11, yet you constantly justify your actions by citing 9/11. I believe the American people deserve the truth from our Government, that is why I support a Congressional investigation of these criminal acts.

9,000 rescue workers are sick from 9/11, and the 5th district has spent close to \$1 billion on the war in Iraq. The legislative aftermath of 9/11 threatens the very foundation of our Country. Most recently with the passage of the military commissions act, you or Mr. Rumsfeld can now label a citizen an enemy combatant, and legally torture them.

I believe I can sum up what has really taken place these past 5 years in one word: oil. Our country was energy independent during WWII; now our military, economy, agriculture, and transportation are extremely vulnerable due to our “addiction to oil”. The next century will consist of increased oil demand worldwide, while oil production will decline. Our nation has become accustomed to cheap oil, but that is coming to an end. I believe our military has been positioned in the Middle East to control the supply of the world’s largest reserves, and laws have been enacted to prepare for the pending social changes that may take place in our “homeland”. Of course this has all been done in the name of terrorism. I believe it is the responsibility of our Government to address the oil issue immediately and honestly so we can return to energy independence; this is the only way we can win the war on terror.

We will continue to face terrorist threats. They are dangerous clandestine groups; if you believe former Secretary of Defense Cohen, they are working on weapons that can affect the weather and even produce earthquakes. If he is correct, we must be dealing with State sponsored terrorist. This is why trust in our Government is imperative, but we can only achieve that if it operates with truth and transparency. I hope to bring a little of that to Congress.
