

9/11/01 an inside job?

By **MATTHEW HORTON WOODSON**, 'Independent' U.S. Congressional Candidate

It's highly possible; so what can you do about it? First, research the facts yourself; secondly, vote November 7 as if our country depends on you.

This past February I first witnessed the collapse of the 3rd World Trade Center building. The 47-story World Trade Center 7 (WTC7) collapsed about 5:20pm on 9/11 at near free fall speed in what appears to be controlled demolition (explosives). After months of research I now have no doubt that domestic criminals were involved with 9/11.

Before February, I had never heard of WTC7; that's because, unlike the twin towers, the media practically censored any coverage of it. If you haven't heard of WTC7 you're not alone; I asked former Attorney General John Ashcroft about WTC7, he said "knew very little about it"; Congressman Frank Lucas is also "unaware" of it.

9/11 was a catalyzing event that is still driving our foreign and domestic policy. It has led to the Patriot Act and to legal torture. Knowing that domestic criminals were involved makes me ask who would commit this crime, and why? Asking myself, what can I do about it? I decided to run for congress.

There are two conspiracy

theories about what happened on 9/11. The 'official' theory has inspired a comic book and a TV movie. The 'alternative' theory is best described in David Ray Griffin's book The New Peal Harbor. He illustrates that Cheney and Rumsfeld are members of "The Project for a New American Century" (PNAC). In September of 2000 PNAC published a paper outlining their long term foreign policy goals. PNAC goals include building bases in the Middle East "even should U.S.-Iranian relations improve", and "stability operations in North Korea". PNAC knew these goals would take a long time to achieve "absent some catastrophic and catalyzing event-like a new Pearl Harbor".

PNAC members understand politics. It has been said the politics is ultimately achieved at the end of a gun (or maybe an anthrax letter). PNAC realizes their goals (like terminating aircraft carrier production, or controlling space and cyberspace) might "cause great upheaval" but it is "key to world power".

Currently, our military, economy, and food supply depends on cheap oil. That is why the Middle East is such a great national security interest. This century we will experience 'peak oil'; this means world oil production will decline, just as world demand is increasing.

I believe our biggest national security threat is our addiction to oil. We must immediately begin the inevitable transition towards reducing oil demand, by being a conservative country.

I believe we can be an energy independent country if our policies encourage it. There are numerous business opportunities for Oklahomans in this transition, and we don't have to sacrifice our American lifestyle.

I believe that policies based on deception are unsustainable, and we need a Government that operates on truth, trust, and transparency. This is why I support a Congressional investigation of the crimes of September 11th.

Most importantly, when we ask our fellow citizens to kill and die in our name, we must be honest about those reasons.

Woodson, age 36, is a first time candidate, who believes an informed and alert public makes for a healthy democracy. Vote November 7- "There comes a time when silence is betrayal" Email: TruthActivist@gmail.com Web:www.VoteWoodson.com
